Subject: Potential CFAC Site Visit

Mike,

I would like to start aiming for a site visit of the Columbia Falls Aluminum Plant sometime the week of July 13th. Since this is our planned Libby week and Rebecca will have numerous meetings for us to attend, I'm wonder if either of the following might work for your schedule.

From the state I'd like to have myself and Keith Large. If possible, I'd ask Colleen Owen and Lisa DeWitt, if they might have time to also attend. To balance work load I need to consider both Keith and Lisa in the mix for the state lead.

Option#1; You and I travel from Libby to Columbia Falls on July 16th, aiming to be onsite 11:30 to 2:00 pm. This would allow Keith Large time to drive up from Helena to meet us. If Lisa were to attend, we might adjust back slightly. How might this work in your schedule?

Option #2; Similar routine, but aim to be onsite from 9:30 to 11:30 on Friday. This would let Lisa complete most of her Libby week duties. Again, I'd want to know how this would work in your schedule.

I'm also assuming, so let me say this clearly, that since this is a potential NPL site I'm thinking we need to work in tandem and that you'd be the tour guide, so to speak, communicating with the onsite CFAC folk about the tour and advising us of any specific health and safety concerns. Naturally, we can show up with hardhats, safety glasses, orange vest and steel toed boots.

Let me know your thoughts,

tom
